IBA at industry meetings

7<sup>th</sup> cyclotron users meeting

## Recent successful projects

### Presidential visit

The Brazilian President Luiz Inácio Lula da Silva inaugurated the Regional Center of Nuclear Sciences in the north-east Brazilian city of Recife.

The President had the opportunity to visit a cyclotron facility where an IBA Cyclone® 18/9 High current was installed.

This project represents an investment of \$15.3 million. The center was designed to meet the long-term need for over than 20 PET scanners. It will allow to reach up to 52,000 PET procedures per year in the region.

### Chile is going for the new Cyclone® 11

The new IBA Cyclone® 11 will be installed at the Fundacion Arturo Lopez Perez in Chile and will be operated by Positronpharma.

The main objective of the company will be the research and development on new  $^{18}\text{F}$  molecules based on the Synthera® multipurpose platform technology.

*"The Cyclone® 11 combines the small footprint of a low-energy machine with technology of high energy cyclotron systems."*  
Said Dr. Horacio Amaral, President of Positronpharma.

### Another IntegraLab® success story

Only 9 months after the project start date, the PET diagnosis centre of Tripoli Medical Center was inaugurated.

"This success and the extremely short installation time has been possible thanks to IBA's Integralab® team expertise together with their partners relationship" said Mr. Hassan Alostha, chairman of Acmem, in charge of this challenging project.

The inauguration was held in September and honored by the presence of four Lybian ministres led by the Lybian Prime Minister Shukri Ghanem.

Operations of this first cyclotron in Libya, a self-shielded IBA cyclotron configuration will start by end of this year.

## New IntegraLab<sup>®</sup> project in Alkmaar

The Medical Center of Alkmaar, NI PET center project is on track thanks to the IntegraLab<sup>®</sup> team of experts.

The first three steps of the IntegraLab project are nearly completed including GMP facility design, radiation safety, cleanroom expertise and equipment selection.

The building construction will start during the first semester 2010.

The PET center is planning to run the IBA Cyclone<sup>®</sup> 18 Twin by April 2012.

Welcome to the IBA group. IBA develops and markets leading edge technologies, pharmaceuticals and tailor-made solutions for healthcare with a focus on cancer diagnosis and therapy. Leveraging on its scientific expertise, IBA is also active in the field of industrial sterilization and ionization. Discover the Truly Accessible Proton Therapy solution: The IBA Proton Beam.

## Industry meetings

After an exciting EANM'09 where you had the opportunity to visit and set-up a 3D PET center on the IBA's booth, we are pleased to invite you to visit us at RSNA on the IBA booth#3260, Hall A, south building to discover all the IntegraLab possibilities for your radiopharmaceutical production center.

## 7<sup>th</sup> Cyclotron User Meeting

IBA's seventh IBA PET Cyclone Users Meeting was held in Istanbul in the end of September where more than 100 participants from over 20 countries attending this event.

21 workshops and 20 presentations took place during 3 days. Customers were pleased by progress made over the two last years.

"IBA's users participation to the various workshops is an important contribution to future product developments" said Philippe Audon, President of IBA's Customer services.

*"I know of no other company who would have the courage to open themselves up to their customers as IBA does at its User Meetings. This in turn engenders a high degree of loyalty from users such as myself who prize information access above everything. This is one of the reasons why I recommend your products."*
